PROFESSIONAL SUMMARY

Fifth-year Computer Engineering student at Al-Balqa Applied University with strong foundations in software development, embedded systems, and networking. Completed a Software Quality Assurance (SQA) internship at the National Software Quality Assurance Centre (NSQAC), Royal Scientific Society. Experienced in machine learning, data analysis, and full-stack web development. Passionate about cybersecurity and AI, with a proven record of hands-on project delivery and active technical leadership.

EDUCATION

Bachelor's Degree in Computer Engineering

Sep 2022 – Present

Al-Balqa Applied University – Faculty of Engineering Technology | GPA: 3.13 (Very Good)

- Published research: "An Enhanced Healthcare Integration System Based on Cloud Computing during the Coronavirus Crisis" – SCIRP Journal

EXPERIENCE

Software Quality Assurance (SQA) Trainee

Jul 2026 – Aug 2026

National Software Quality Assurance Centre (NSQAC), Royal Scientific Society – Jubeiha, Amman, Jordan | 280 Hours

- Executed the software testing lifecycle on real government digital systems — from requirements analysis and test case design through execution, defect logging, and re-verification testing.
- Performed functional, cross-browser, responsiveness, and bilingual (Arabic/English) testing; tracked and resolved defects in Jira across iterative Customer Journey testing rounds.
- Researched performance-testing methodologies and AI-based testing tools, and presented technical findings to the QA team.

PROJECTS

NetGuard – Network Safety Analyzer

Nov 2025

- Built a Python-based DNS hijacking detection tool (NetGuard v2.0) that monitors traffic, validates DNS responses against RFC 1035, and flags malicious records with structured severity reports.
- Delivered both a CLI and a Flask web dashboard for real-time results; roadmap includes ML-based anomaly detection and DNSSEC integration.

HR Employee Attrition Predictor

- Trained an MLP neural network to predict employee attrition using satisfaction score, tenure, project count, and promotion history.
- Built a Flask web interface for HR teams to input employee data and receive instant retention predictions with probability scores.

BAU-Auto-Evaluation – Browser Automation Script

Apr 2026

- Built a JavaScript userscript that fully automates course evaluations at BAU — dynamically detecting any number of questions, handling captcha validation, and submitting forms via a single-click popup.
- Reduced a multi-step manual process to an instant automated workflow, demonstrating practical DOM manipulation, form interaction, and browser scripting skills.

Ollama-chat – Local AI Chat Interface

May 2026

- Built a responsive Next.js and TypeScript web app for chatting with large language models running entirely locally via Ollama, delivering full data privacy, offline capability, and zero API costs.
- Leveraged Next.js and TypeScript's type safety to produce a performant, maintainable, production-grade codebase.

LEADERSHIP & VOLUNTEERING

IEEE WIE (Women in Engineering) – Active Member

Al-Balqa Applied University

- Contributed to organizing the TechVision event (April 2025).
- Onboarded and trained new IEEE members; managed digital content strategy.
- Coordinated team tasks and promoted collaborative engineering culture.

IEEE BAU Student Branch – Volunteer

Al-Balqa Applied University

- Assisted in organizing technical workshops and engineering awareness events.
- Supported initiatives empowering women in engineering.

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript, TypeScript, Assembly, SQL, HTML, CSS

Frameworks: Flask (Python Web), Next.js

Tools: MATLAB, SQL Databases, Git, Jira, Zephyr Scale

Core Areas: Machine Learning & AI, Neural Networks (MLP), Data Analysis, Full-Stack Web Development, Cybersecurity, DNS & Network Protocols, Operating Systems (Windows & Linux)

LANGUAGES

Arabic: Native

English: Full Professional Proficiency

CONFERENCES

- From Venus to Universe (Parts 1 & 2) – Amman, Jordan | March 2024
- TechVision – Amman, Jordan | April 2025
